

Carat Balances Sparkling Performers

Balances with Swiss Technology

METTLER TOLEDO stands for Jewelry balances made in Switzerland. Our balances are built to last and designed to be accurate and reliable in even the toughest working environments. Be confident in highly reproducible weighing results.

JP – Jewelry Plus

High quality for demanding users, with more features as standard: fully automatic self-adjustment (FACT); a high contrast HCD display; two RS232 interfaces for simultaneous connection of an auxiliary display and printer or PC; built-in density determination software.

JS – Jewelry Standard

Performance with value: Manual one-keypress calibration with built-in internal weight; legible, back-lit display; RS232 interface for connecting an auxiliary display, printer or PC.

Multifaceted Options For the Gem Trade

Working with diamonds and other gemstones requires absolute precision – a small weight discrepancy means loss of money. So it is essential to have a precise and reliable weighing instrument: a balance that simply works the way you expect it to, delivering accurate, trustworthy and repeatable results every time.

All carat balances feature easy and straightforward operation, fast settling time, high repeatability, plus bright and clear display for highly visible weighing results.
